

SmartFusion: A Great Balancing Act

Whitewater rapids are no comparison to the quick pace of daily life in a Finance Department. It's important to have the best people in the boat to paddle, steer and navigate you safely down the river. At CSI we've got great software and a team of experts to help you stay on course.

SmartFusion provides a seamlessly integrated ERP (enterprise resource planning) solution for the public sector. The SmartFusion family of products includes Financial Management, Payroll and Human Resources, Billing and Revenue Management and Automated Workflow.

Because the public sector is our only focus, we have particular understanding of the needs and challenges facing government and K-12 organizations. Identifying and establishing best practices is another huge factor in becoming a more effective organization. As a standard part of any SmartFusion implementation, our consultants will perform a Business Practices Evaluation and then make strategic recommendations for process optimization.

CSI has developed a formal implementation methodology that allows us to consistently deliver our software solution on time and within budgetary expectations. At CSI, we know our customers expect prompt, courteous, effective support - it's what keeps them with us year after year. We set high standards for ourselves and are committed to providing quick response and quality customer service.

Powerful software designed for the public sector

- **Financial Management Software:** CSI SmartFusion financial management software suite follows Government Accounting, Auditing, and Financial Reporting (GAAFR) standards and Generally Accepted Accounting Principles (GAAP). Because we know it is important to our customers that we follow industry standards, you can rest assured that SmartFusion gives you the functionality you require for accounting, budgeting, fixed assets and procurement.
- **Payroll and Human Resources:** Help your HR department with the multitude of tasks related to your organization's most valuable asset – its people. Ensure that employees are paid on time and in step with your organization's compensation guidelines. Full integration with our budgeting module provides more accessible information and accurate planning. With features such as applicant tracking, employee self service, time and attendance, and reviews and evaluations, this suite of software provides a busy Payroll and HR staff quick access to information they need throughout all phases of employment.
- **Billing and Revenue Management:** The billing and revenue management software is fully integrated with our powerful financial management suite. For government agencies that collect revenues from utilities, licensing and other fee-based services, this family of software provides advanced tools for managing customers, addresses, and other pertinent information.
